Safety Data Sheet
ABE 90% Dry Chemical Powder
Dated: 30 November 2016

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

1.1 GHS Product Identification

ABE 90% Dry Chemical Powder

1.2 Application and Use

Multipurpose extinguishing powder for use in portable fire extinguishers for Class A, B & E fires.

1.3 Company Identification:Firebox Australia Pty Ltd
Lot 5/19 Balook Drive, Beresfield NSW 2322**Emergency Telephone Number**

02 4966 4465

1.4 Product Description

Mixture of monoammonium phosphate, ammonium sulphate and additives

2. COMPOSITION/INFORMATION ON INGREDIENTS

Substance	Synonyms	Concentration	Health class	CAS No.
Monoammonium phosphate	MAP	<87	R36, 37, 38	7722-76-1
Ammonium sulphat		0~7	R36, 37, 38	7783-20-2
Mica		<4	R36, 37, 38	12001-26-2
Attapulgis clay	Atapulgit	<2	R36, 37, 38	8031-18-3
Amorphous silica	Synthetic silica	<3	R36, 37, 38	7631-86-9
Methyl Hydrogen Polysiloxane	Silicon	<1	R36, 37, 38	68037-59-2

3. HAZARDS IDENTIFICATION

GHS Classification of the substances / mixture: Classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Classification as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail (7th Edition)

Signal Word (s): Warning

Hazard Statement (s): H280 Contains gas under pressure; may explode if heated.

Pictogram (s): Gas Cylinder

Precautionary Statement - Storage: P410+P403 Protect from sunlight. Store in a well-ventilated place.

Precautionary Statement – Disposal: P501 Dispose of contents/container to an approved waste

4. FIRST AID MEASURES

First aiders should know and take the precautions appropriate to avoid danger to themselves and the casualty. Take casualty together with material safety data sheet of this product to hospital or doctor, if necessary.

First Aid - Inhalation: Remove casualty from exposure. If there is breathing difficulty or cough, keep patient at rest, seated in position of maximum comfort.

First Aid - Skin: Wash off with warm soapy water. A moisturiser may be used to replenish lost oils. If persistent irritation occurs, obtain medical attention.

First Aid - Eye: Wash out eyes with plenty of water or eye wash solution and seek medical attention.

First Aid - Ingestion: Rinse mouth, drink large amounts of water. Seek medical help.

5. FIRE FIGHTING MEASURES

General Hazards

N/A This product is for fire fighting purposes.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Avoid contact with skin and eyes. Do not breathe dust.

Personal protection: Wear protective clothing specified for normal operations.

Environmental precautions: SPILLAGE - Dispose of in compliance with local and national regulations.
Components are non-hazardous, sanitary landfill disposal may be acceptable.

Clean-up methods: Sweep up or vacuum. Do not use strong alkali cleaning products. Store in covered containers.
Do not reuse. In case of large spills, use rubber gloves, chemically resistant suit and boots, hard hat and air purifying respirator

7. HANDLING AND STORAGE

Should be stored in original containers. Store in dry, cool, well-ventilated place away from alkaline compounds. Wash after handling. Do not cut, grind, weld or drill on or near product containers. Treat empty containers as if they were full.

Personal Protective Equipment - Fire Fighting

The powder will be used in fire fighting. This process may involve exposure to heat, flame and possibly toxic vapours and fumes. We recommend using appropriately designed personal protective equipment for fire fighting situations.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

General precautions: Use in well ventilated areas and follow good general housekeeping procedures.

Personal Protective Equipment - Other Handling

Avoid prolonged, extensive or repeated inhalation or contact to eyes and skin.

Hand Protection Wear rubber gloves for routine industrial use.

Eye Protection Recommended as mechanical barrier for prolonged exposure. Safety glasses or chemical type goggles.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state: Solid pH (1% soln.): 4.2 – 4.7

Colour:	Yellow/Grey		
Melting Point:	190 °C	Odour:	Odourless
Flammability:	Not flammable	Solubility:	About 22.7 g/100 g H ₂ O @ 0 °C
Specific Gravity:	About 1.9		

10. STABILITY/REACTIVITY

Stability

Stable up to 190 °C. Avoid mixing with strong alkalis. Do not mix with BC type dry chemical extinguishing agents.

Hazardous Decomposition Products

Do not expose containers to extreme heat or flame, since the containers are made from polyethylene and/or polypropylene and will burn. Thermal decomposition of containers and/or products may generate acrid smoke and fumes / traces of NH₃, SO_x and PO_x.

11. TOXICOLOGICAL INFORMATION

Inhalation

Inhalation of hazardous amounts is unlikely when used as intended. Is irritant to respiratory tract when inhaled.

Ingestion

Low oral risk when used as intended. May cause nausea, vomiting and diarrhea when ingested.

Contact to eyes or skin

Low risk if appropriate precaution measures are taken (see section 6). Can cause skin irritation and damage to the eyes.

12. ECOLOGICAL INFORMATION

Persistence/degradability:	Biodegradable. Ammonium phosphate and ammonium sulphate are common fertilisers for many crops.
Bioaccumulation:	Bioaccumulation is unlikely to occur due to metabolism and excretion.
Biodegradation:	No data available at present.
Ecotoxicity:	No data available at present.

13. DISPOSAL CONSIDERATIONS

Waste should be disposed via local authority waste collection service or registered waste carrier. Ensure the destination is a licensed facility.

Dispose of in compliance with national, regional, and local provisions that may be in force.

14. TRANSPORT INFORMATION

UN number: UN1044

Proper shipping name: Fire extinguishers with compressed or liquefied gas

Hazard Class or Division: Not a hazardous substance.

Road and Rail Transport (ADG Code):

This material is classified as Dangerous Goods Division 2.2 – Non-flammable non-toxic Gases according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th Edition)

Division 2.2 Dangerous Goods are incompatible in a placard load with any of the following:

- Class 1, Explosives

Division 2.1 Flammable Gases when the Division 2.2 gas has a subsidiary risk 5.1 except when all are packed in cylinders or pressure drums not exceeding 500L capacity.

- Division 4.2, Spontaneously Combustible Substances

- Division 5.2, Organic Peroxides

Marine Transport (IMO/IMDG):

Classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.

Division: 2.2

EMS- F-C, S-V

UN-No: 1044

Special Provisions: 225

Proper shipping Name: Fire extinguishers with compressed or liquefied gas

Air Transport (ICAO/IATA):

Classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

Packing Instructions (cargo only): 213

Packing Instructions (passenger & cargo): Forbidden

Special Provision: A19

UN-No: 1044

Proper shipping Name: Fire extinguishers with compressed or liquefied gas

IMDG Marine pollutant: No

For additional transport information, contact Ansul Incorporated.

No harm to the environment is expected from this preparation.

15. REGULATORY INFORMATION

R Phrases:	22 Harmful if swallowed. 36/37/38 Irritating to eyes, respiratory system, and skin.
S Phrases:	26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. 36 Wear suitable protective clothing.
Poisons Schedule	Nil
AICS (Australia)	All ingredients are listed in the Australian Inventory of Chemical Substances (AICS).

16. DISCLAIMER

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
